

Connecting Kids to A+ Health Coverage for Back-to-School Season

May 17, 2017
2:00 p.m. EDT

Agenda

- Overview and Introductions
- Using a School-Based Approach to Children's Health Coverage
- Improving Health Outcomes for Students
- School-Based Outreach and Enrollment Toolkit
- Campaign Back-to-School Resources
- Questions and Answers

Poll Question: What type of outreach and enrollment activities has your organization found successful for Back-to-School season?

- a. School information nights**
- b. Backpack drives**
- c. Immunization clinics**
- d. Adding information to school registration forms**
- e. We have not done any Back-to-School outreach**

Happy, Healthy and Ready to Learn: Insure All Children

A School-Based Child Health Outreach and Enrollment Toolkit

Rebecca Shaw

Project Coordinator, Children's Programs Department
The School Superintendents Association (AASA)

| [InsureKidsNow.gov](https://www.insurekidsnow.gov)

AASA State Affiliates

- AASA's 13,000 membership is largely superintendents, but also includes other key administrators, school board members, scholars, and researchers.
- AASA has **seven regions** and **49 chartered state affiliates** enabling us to reach every school district in the country.
- Learn More: <http://www.aasa.org/content.aspx?id=23878>

Our Partnership

- Children's Defense Fund (CDF) and AASA have long recognized the critical importance of access to high-quality health care to student achievement.
- Since 2011, the two organizations have worked with **15 school districts** to identify and enroll eligible children in Medicaid and CHIP in school districts with some of the largest numbers of uninsured children.
- CDF and AASA's work with health insurance focuses on
 - Systemic change
 - Capacity building
 - Sustainability

Children's Defense Fund State Offices

- During this initiative we worked closely with the following state offices: **CDF-Texas** and **CDF-California**.
- These state offices provide on-the-ground technical assistance, such as guiding uninsured students and their families through the health insurance enrollment process.

Our Vision

#Insure All Children

You don't let barriers stand in the way of accomplishing the mission of educating children.

DEAR LORD
BE GOOD TO ME
THE SEAS SO
WIDE AND
MT BONTIS
SO SMALL

AASA
THE SCHOOL SUPERINTENDENTS ASSOCIATION

Supt. H.D. Chambers
Alief ISD, Texas

Why is this work important for schools?

Children enrolled in Medicaid miss fewer classes and perform better in school than those uninsured.

#InsureAllChildren

DEAR LORD
BE GOOD TO ME
THE SEA IS SO
WIDE AND
MY BOAT IS
SO SMALL
Children's Defense Fund

AASA
THE SCHOOL SUPERINTENDENTS ASSOCIATION

InsureKidsNow.gov

Our Strategy

It's a simple question:

**Does your child have
health insurance?**

#InsureAllChildren

InsureKidsNow.gov

Does Your Child Have Health Insurance?

- Yes No I don't know

If you checked “No,” your child may be eligible for free or low-cost health insurance through Medicaid or CHIP.

- Please check this box to get more information or assistance in obtaining health insurance for your child(ren).**
- I would like assistance with renewing my child's health insurance.

I consent to (*School District/Community Health Enrollment Partners*) contacting me with more information.

Parent/Guardian Signature _____ Phone: _____

Date: _____

Does your child have health insurance?

Happy, Healthy, and Ready to Learn! #InsureAllChildren

Schools are in a unique position to identify and connect eligible children to health insurance. Our goal in offering this toolkit is to provide school and community leaders and parents and child advocates with a framework to build community support for connecting children to health insurance through schools and to provide the practical steps schools need to take to implement a successful and sustainable campaign. This toolkit sets the stage for school districts to partner with community agencies to identify and enroll eligible students in health insurance through a proven strategy in a simple, routine and cost effective way. **When we insure our children, we ensure our future.** Asking this simple question, **"Does your child have health insurance?"** on important annual school forms, is central to ensuring all children in your school district are happy, healthy and ready to learn.

Make sure to visit the Toolkit User's Guide as you get started.

District Team Self-Assessment - School-Based Child Health Outreach and Enrollment

Directions: For each question below, think about your school district and answer the questions below. Check RED if you haven't begun work, YELLOW if you have started work, and GREEN if key elements are in place. This self-assessment can be printed and referenced as you and your team work to enroll students in children's health insurance.

First: Last: Email: Zip Code: School District:

Be sure to answer all the questions by checking the RED, YELLOW or GREEN circles. All questions need to be answered in order to successfully submit the assessment. You will receive an error message if incomplete.	Key Elements Not In Place	Room for Improvement	Key Elements In Place
Have you estimated the number of uninsured children in your county and school district?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you have the support of the Superintendent and school districts leaders?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you have a project leader and interdisciplinary team chosen for children's health insurance enrollment work?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Have you added the health insurance question to annual student enrollment forms?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Has a system been established for obtaining written consent from parents to allow data sharing?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you know the healthcare marketplace open enrollment dates and have you planned enrollment events for school health fairs and parent meetings?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Build Your Team

Why

Why Build a Team? As a district or school, you have decided to address the challenge of children without health insurance. The next steps are to 1) build a team; 2) identify uninsured children; 3) add a health insurance question to your annual forms; 4) enroll students and/or develop partnerships to enroll students; and 5) develop a plan for sustainability and evaluation of your effort.

It's important to build a team of those:

- Who have the authority to make decisions or systems changes;
- Whose function in the school district is related to health and wellness;
- Who have strong connections to parents and community agencies; and
- Who can affect school and district policies.

Who

Who Should Be on the Team? Critical to the foundation of the CDF/AASA proven strategy are the superintendent, the district information technology lead and the district's coordinator or director of school health.

The buy-in and engagement of the superintendent will facilitate implementation, compliance and replication of the health insurance initiative. The superintendency is a bully pulpit in your community. It provides an important platform from which to advocate an agenda that healthy children are better learners, so schools have a role in identifying students without health insurance and helping them obtain coverage. The superintendent represents your team's vision for healthy children and can engender support throughout the community.

How

How Do You Build Successful Teams?

Successful teams regularly reassess to ensure they have the right internal and external mix of people, partnerships, potential and power. They call on their networking skills to get to know "who's in the room" at meetings and conferences, who can be engaged and to whom the team should communicate progress or project needs.

Successful teams are not only diverse in terms of areas of expertise or influence, but they need to continually seek to educate and expose others in the district and community to enrollment efforts. Teams can broaden their membership to include community businesses, local and state political representatives, and district union representatives which may prove beneficial for action planning and sustainability.

How

How Do You Build Successful Teams? Successful teams regularly reassess to ensure they have the right internal and external mix of people, partnerships, potential and power. They call on their networking skills to get to know "who's in the room" at meetings and conferences, who can be engaged and to whom the team should communicate progress or project needs.

Successful teams are not only diverse in terms of areas of expertise or influence, but they need to continually seek to educate and expose others in the district and community to enrollment efforts. Teams can broaden their membership to include community businesses, local and state political representatives, and district union representatives which may prove beneficial for action planning and sustainability.

Successful teams keep things simple and piggyback on systems already in place. Teams need to identify the appropriate routine district forms where a question about a child's health insurance can be added. *The school enrollment form is where CDF and AASA recommend school districts begin, but the school enrollment form may not be an annual form in every district.* In some school districts, the emergency contact form, the student health card, or another form is required annually at the start of the year. Learn more about adding the health insurance question to key school forms.

Successful teams track data and measure outcomes to evaluate what's working and what is not. Teams need to develop strong strategic work and sustainability plans right from the start to guide their efforts. Sustainability plans help teams set goals and establish guidelines for achieving and measuring the impact of their activities. Within a sustainability plan, districts should incorporate action plans that will drive implementation for the initiative and capture school district successes, challenges and lessons learned. CDF and AASA encourage action planning because successful teams have a plan — and a back-up plan or two.

Successful teams ask questions, take educated risks and are not afraid to modify their plan or their team's composition.

District Spotlight: Building Successful Teams

Mountain View School District, El Monte, California

The Mountain View School District in El Monte, CA, creatively built a multi-disciplinary team that included the superintendent, school board members, key school administrators, school nurses, school office managers, community liaisons and health clerks. To build community, establish need, and get buy-in, the district brought key team members "on board" a "Gilligan's Island" themed-tour of their community. The "crew" boarded a bus for their "three-hour tour," which took them to visit several local health clinics serving children and families in the El Monte community. At each site, the school district team learned about the great need in their community for assistance with health insurance enrollment, as well as the myriad of services offered to their students. The strongly motivated team then developed a seamless referral process to guarantee that all uninsured children in the district would be connected to the enrollment assistance needed.

Stories from Local Districts

Story

In the Edinburg Consolidated Independent School District in Edinburg, TX the story of a 12-year-old with a pre-existing health problem and no insurance captures the heartbreak and limitations for children without access to health care. With a debilitating heart condition, Evelyn could not participate in any physical activities and often ended up in the nurse's office suffering from shortness of breath. The nurse urged Evelyn's mother to take her to a heart specialist. But her mother, even with a full time job, could not support her family and afford the doctor's fees. Through the school's health enrollment outreach efforts, the school nurse referred Evelyn and her mother to an outreach worker who successfully helped them navigate the health insurance application process. Weeks later, Evelyn had open-heart surgery to replace a faulty valve. Now Evelyn's mother has become an ambassador for the school's enrollment efforts and has become more involved with her daughter's education.

Edinburg CISD, Texas

Story

Martin arrived in Compton, California as an unaccompanied minor without health insurance. His nomadic journey across America included violence, poverty and separation from his mother and siblings. When Martin enrolled in the Compton Unified School District, a staff member connected him to a social worker. As an unaccompanied minor, the district provided gift cards for clothes and food, helped him get eyeglasses and health insurance. With his new insurance, Martin was able to receive the therapy he needed to address the trauma from the violence and his multiple relocations. He credits his successful graduation from high school with honors and admission into 11 universities to the support he received from the school district. Martin is now following his dream of becoming a college graduate and creating a better life for himself and his family.

#InsureAllChildren

“We want children to be well every day so we are looking at policy and practices that support keeping our children in school. Healthier students are better learners.”

– Nurse Manager Gwen Johnson, Houston ISD, Texas

The chalkboard graphic features several hand-drawn diagrams: a 3D cube with vertices labeled A through H, a green coordinate plane with axes and points, and a circle with a horizontal line through its center and the equation $C = 2\pi r$ written below it.

When we insure our children, we ensure our future. Asking the simple question, “Does your child have health insurance?” on important school forms, is central to ensuring all children in your school district are happy, healthy and ready to learn! You can help spread the word in your community, state and across the nation by using #InsureAllChildren in your social media conversations. We invite you to join @childdefender and @AASAHQ as we help school districts across the country connect children with the health insurance they need to survive and thrive. Please find messaging and other content to share with your community in the #InsureAllChildren social media guide.

Together we can make sure all children are happy, healthy and read to learn. Let's #InsureAllChildren

Having health insurance is critical for our children to thrive at school and in life. In fact, children with health coverage are more likely to complete high school and graduate college compared with their peers who don't have access to care.² Fortunately, there are free and low-cost health insurance options available through [Medicaid and the Children's Health Insurance Program \(CHIP\)](#). These programs cover a broad set of benefits, including doctor visits, dental care, immunizations, prescriptions, mental health services, and more. You can have a regular doctor for your child and be protected from unexpected accidents and illness. [Medicaid and CHIP](#) is quality health insurance for working families — children and teens in a family of 4 earning up to [\\$XX,XXX*](#) a year may qualify. And don't forget, if your child is already enrolled in these programs, it's important to renew their coverage every year so they can get the care they need when they need it. Here in [COMMUNITY](#), you can get in-person help signing up or renewing your coverage from [ORGANIZATION NAME](#); just visit [POXX.COM](#) or call [POXX-XXX-XXXX](#). Get your children the health coverage they deserve and have one less thing to worry about.

Website blurb

From cold and flu season to playground injuries, having kids means expecting the unexpected. Make sure they have the health insurance they need to stay healthy and safe. Free and low-cost coverage is available through [Medicaid and the Children's Health Insurance Program \(CHIP\)](#). These programs cover a broad set of benefits, including regular doctor visits, dental care, immunizations, prescriptions, mental health services, and more. A family of 4 earning up to [\\$XX,XXX](#) a year may qualify. You can get in-person help applying, too; just visit [POXX.COM](#) or call [POXX-XXX-XXXX](#). Get your children and teens covered today.

Social Media Posts

Customize posts with your state program name and information where applicable and don't forget to link to your website where it says [WEBSITE LINK](#). The Campaign offers a library of social media graphics for Facebook and Twitter that you can add to posts. The posts that follow are a sampling of available graphics; view the full library [here](#).

*Your state's income limit for a family of four at 200% of the Federal Poverty Level (FPL). To find the annual FPL figure, visit: [ASPE Poverty Guidelines](#). To find the specific FPL guidelines for your state, click [here](#) or contact your state's Medicaid or CHIP program for information. Note: The income level figure will change from year to year based on the annual release of FPL guidelines.

Year-Round Enrollment

Back-to-School & School-Based Outreach

During the school year, there are a variety of ways to let parents and caregivers know that their children and teens may be eligible for free or low-cost health insurance through Medicaid and the Children's Health Insurance Program (CHIP). With health insurance, they can get the immunizations, check-ups, eye exams, dental visits and other care they may need to fully participate in classroom, after-school and summer activities. Schools are great partners to help reach and enroll families with children who are eligible for Medicaid and CHIP.

Back-to-School & School-Based Outreach Materials

The Campaign has outreach tools and materials to support school-based outreach efforts. Below are outreach materials specifically tailored for Back-to-School and other school-based outreach. You can learn about how others have used these and other campaign materials in our eNewsletters, webinars, and videos.

Campaign materials—including tools for other initiatives—can be found in the [Outreach Tool Library](#).

Back-to-School Toolkit

Use this go-to resource to cultivate relationships with school staff and to partner with schools on activities to get kids covered and keep them covered.

Guide to School-Based Outreach for Health Coverage Enrollment

By Shelby Gonzales and Jodi Kwarciany

About This Guide

To find children and family members who could be eligible for free or low-cost health insurance coverage, schools are among the best places to look. A 2016 report from the Urban Institute and the Robert Wood Johnson Foundation found that nearly half of the nation's uninsured-but-eligible people live in families with at least one school-age child.¹

For years, community organizations, health care providers, school leaders, and other civio-sector actors have used a variety of school-based outreach strategies to increase enrollment in Medicaid, the Children's Health Insurance Program (CHIP), and, in recent years, to subsidized coverage in the Affordable Care Act's marketplaces. These strategies have demonstrated that school-based efforts can be a fruitful path for expanding health care coverage.

This guide shares strategies that school-based outreach groups identify as key to the success of their work and describes lessons learned to help groups avoid approaches that have yielded disappointing results.

This resource builds on more than two decades of health coverage outreach experience at the Center on Budget and Policy Priorities, a review of literature on school-based outreach, consultation with national experts, and interviews with key people from 11 school-based outreach programs, including groups funded by Atlantic Philanthropies. The interviews took place between November 2015 and March 2016 and include outreach leaders, application assistance providers, school district employees, state-level coordinators, and funders of local outreach, state department of education staff, and
