

Think Teeth

See Your Dentist While You Are Pregnant

It's important to visit the dentist while you are pregnant. Why? Your oral health is important for your growing baby's health.

- Tooth decay is caused by bacteria. Your baby can “catch” the bacteria from you.
- Keeping your teeth and gums healthy now can help protect your baby's teeth later.
- Here's how you can prevent dental disease:
 - Brush and floss daily, and use fluoride toothpaste.
 - Eat a healthy diet.
 - Visit the dentist. Dental care during pregnancy is safe – this includes x-rays and local anesthesia.

Schedule a check-up today. If you need help finding a dentist, ask your doctor. Be sure to tell your dentist or hygienist that you are pregnant.

You could be eligible for free or low-cost health coverage through Medicaid. Some states have dental coverage for pregnant women.
